April 2010

Journal of Systems and Software, Volume 83 Issue 4**Publisher:** Elsevier Science Inc.**Bibliometrics:** Downloads (6 Weeks): n/a, Downloads (12 Months): n/a, Downloads (Overall): n/a, Citation Count:

To reduce the environmental impact, it is essential to make data centers green, by turning off servers and tuning their speeds for the instantaneous load offered, that is, determining the dynamic configuration in web server clusters. We model the problem ...

Keywords: Dynamic cluster configuration, Dynamic power management, Dynamic voltage scaling, Web server clusters

2 [ALVIC-NG: state management and immersive communication for massively multiplayer online games and communities](#)[Peter Quax](#), [Bart Cornelissen](#), [Jeroen Dierckx](#), [Gert Vansichen](#), [Wim Lamotte](#)

October 2009

Multimedia Tools and Applications, Volume 45 Issue 1-3**Publisher:** Kluwer Academic Publishers**Bibliometrics:** Downloads (6 Weeks): n/a, Downloads (12 Months): n/a, Downloads (Overall): n/a, Citation Count:

ALVIC-NG is an architecture for networked games based on the classic client/server paradigm. While peer-to-peer and hybrid systems have been extensively researched, the client/server approach provides many advantages that are beneficial or even required ...

Keywords: Communication, Conferencing, Networked virtual environments, Scalability

3 [Communications of the ACM, Volume 54 Issue 3](#)

March 2011

Communications of the ACM

Publisher: ACMFull text available: [Digital Edition](#), [PDF](#) (11.32 MB)**Bibliometrics:** Downloads (6 Weeks): 154, Downloads (12 Months): 251, Downloads (Overall): 251, Citation Count:**4** [Regular Paper: Load-Balanced Drift-Diffusion Model Simulation: Cluster Software Performance Evaluation](#)[Stilianos Bounanos](#), [Martin Fleury](#), [Sebastien Nicolas](#), [Anthony Vickers](#)

May 2007

International Journal of High Performance Computing Applications, Volume 21 Issue 2**Publisher:** Sage Publications, Inc.**Bibliometrics:** Downloads (6 Weeks): n/a, Downloads (12 Months): n/a, Downloads (Overall): n/a, Citation Count:

Design of an avalanche photodiode with high gain and low noise that can achieve single photon counting is a research application of the drift-diffusion model. System-level load balancing when combined with application-level load balancing is shown to ...

Keywords: Charm++, MOSIX, adaptive simulation, cluster computing, optoelectronics

5 [Design of a flexible platform for execution of medical decision support agents in the intensive care unit](#)[F. De Turck](#), [J. Decruyenaere](#), [P. Thysschaert](#), [S. Van Hoeske](#), [B. Volckaert](#), [C. Danneels](#), [K. Colpaert](#), [G. De Moor](#)

January 2007

Computers in Biology and Medicine, Volume 37 Issue 1**Publisher:** Pergamon Press, Inc.**Bibliometrics:** Downloads (6 Weeks): n/a, Downloads (12 Months): n/a, Downloads (Overall): n/a, Citation Count:
